

SHRAVAN BOLOOR

Senior Frontend Engineer | React & TypeScript | Fintech Product Development

Udupi, Karnataka, India • +91-9483693865 • shravanboloor1@gmail.com • shravan.space • linkedin.com/in/shravan-boloor-3a669a16a • github.com/shravan27090

PROFESSIONAL SUMMARY

Frontend-focused Full-Stack Software Engineer with 5+ years building production web applications, with deep specialization in fintech payment infrastructure. Currently architecting the customer-facing payment portal at Cake Capital (1000+ daily transactions, 99.9% uptime) using React, TypeScript, shadcn/ui and Django/Xano APIs. Proficient in AI-assisted development workflows to accelerate delivery without compromising code quality. Delivered 11+ full-stack products across fintech, SaaS, and e-commerce, and has led engineering teams of up to 4.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), TanStack, shadcn/ui, Tailwind CSS, Bootstrap, HTML5/CSS3, Framer, Webflow

Backend & Databases: Node.js, Django, Xano, Supabase, SQL, REST & GraphQL API design, Database Architecture

Payments & Integrations: Razorpay, Stripe, Webhooks, Google Auth, Slack, Make

Tools & Practices: Git/GitHub, Agile Development, AI-Assisted Development (Claude, ChatGPT, Antigravity, Gemini), Team Leadership, Client Management

No-Code Platforms: Bubble.io, Airtable (used for rapid prototyping and MVP validation)

PROFESSIONAL EXPERIENCE

Software Engineer (Frontend) | Cake Capital

Dec 2023 – Present

Fintech infrastructure company — global money movement • Remote (Canada-based team)

- Architected and built the front-end of a payment portal from scratch in React and TypeScript using shadcn/ui, now processing 1,000+ daily transactions at 99.9% uptime.
- Integrated Xano and Django APIs to power real-time data synchronization across wallet balances, transfers, and multi-currency conversion.
- Shipped core product features including in-app messaging, payment-expiry timers, multi-currency display, digital wallet, and bulk transfers.
- Built webhook-driven Slack notifications for real-time transaction monitoring, reducing manual reconciliation effort.
- Developed mobile-responsive interfaces improving cross-platform usability and user engagement.
- Actively use AI-assisted development workflows (prompt engineering, AI pair-programming) to accelerate feature delivery while maintaining code quality.

Software Engineer / Team Lead | iPangram

Sep 2023 – Dec 2023

Gujarat, India

- Engineered a Zoho CRM plugin extending platform capabilities for client-specific business processes, including CRUD operations on standard Zoho tables.
- Led a development team of 4, assigning daily tasks and resolving technical blockers through sprint planning and code reviews.
- Implemented API integrations using Bubble and custom automation tooling to streamline client operations.

Software Engineer | Starlly Solutions Pvt Ltd

Feb 2023 – Sep 2023

Bengaluru, Karnataka, India

- Built 20+ reusable React components and template pages across 5+ SaaS projects, cutting development time by 35%.
- Implemented responsive, cross-browser-compatible web pages using React, Bootstrap, and JavaScript.
- Executed third-party API integrations enabling seamless data flow and expanded application functionality.

Software Engineer | Surya Digitech Pvt Ltd

Dec 2020 – Feb 2023

Bengaluru, Karnataka, India

- Engineered 11+ full-stack web applications, owning front-end design, database architecture, and backend logic end-to-end.
- Implemented complex product features including secure payment processing, real-time messaging, video calling, and automated email notifications.
- Built additional applications on AppSmith using JavaScript and GraphQL APIs for enterprise clients.

KEY PROJECTS

- College Details Management System — Designed the database schema and built the UI for student and course information management.
- Logic Gate Simulation Tool — Built an interactive simulator for logic gate operations and digital circuit design.
- Congestion Control Using ML — Applied machine learning techniques to optimize network traffic flow and resource allocation.

EDUCATION

B.E., Computer Science & Engineering — 2016 – 2020

SMVITM, Udupi, Karnataka, India
